Job experience & Projects

JOB EXPERIENCE

DOMUS Promotion (real estate company)*: Internship Web developer, March to May 2015*
Conception and creation of a website for DOMUS. My mission was to create a website usable by the company. I hand-coded using PHP, HTML, CSS and SQL for the front-end and the back-end. The project became the offical website of the company for few years. I also created a data base and an administrator interface allowing to modify the content of the website. Since DOMUS didn't have any Computer Science engineers or IT service, I was the only person working on this project.

Camping Parc de la Côte Sauvage Yelloh Village*: Summer job as receptionist, July & August 2010,2011,2012*
This job as a member of a team of receptionist helped me to improve my communication skills with costumers but also to learn communication within a team. Since the camping is international, I improved my English skills during

PROJECTS

- Creation of a portfolio website design with Photoshop and Dreamweaver
- Development of a social network for students and professional with Joomla
- Development of a web site for the association "Initiative Sport"

Activities and interests
